The Director of Central Intelligence

Washington, D.C. 20505

Intelligence Research and Development Council

IR&DC 82-3304  
5 January 1982

MEMORANDUM FOR: R. D. DeLauer  
Chairman

USDRE has seen  
7 JAN 82  
+

FROM:

[redacted]  
Executive Secretary

25X1

SUBJECT: Update

*Duk* —

For your information please find a short recap of where we are with certain Council projects:

a. IR&DC Imagery Report

Please see the attached letter to you from [redacted] Admiral Inman has approved the recommendations we advanced in both your forwarding letter and the report itself, and I have notified the Council members of this decision. Les Dirks has been asked to provide for the funding requirements. As this is the first report out of our hopper, I think that we are off to a good start. (Attachment A) [redacted]

25X1

25X1

b. STAP Scientific and Technical Intelligence Report

In your absence and as a result of your note to me concerning how we might bring more attention to [redacted] recommendations concerning the importance of S&T intelligence, I drafted a short note to [redacted] with copies to Mr. Casey and Admiral Inman for your signature. However, when I brought it over, you had already left. Therefore, I signed for you and sent it out. I have furnished [redacted] a copy of the note. (Attachment B) [redacted]

Director  
Intelligence Community Staff  
Washington, D.C. 20505

ICS-81-0756  
17 December 1981

MEMORANDUM FOR: Richard D. DeLauer  
Chairman, Intelligence Research and  
Development Council

SUBJECT: IR&DC Report: The Impact of Emerging Technologies  
on Imagery Processing and Exploitation [REDACTED]

25X1

1. Admiral Inman has asked me to pass on to you that he has reviewed the Council report and has approved the recommendations it contained. He has asked Les Dirks to provide the funding required by EXRAND so that they may begin the generation of the technology development plan. [REDACTED]

25X1

2. I believe our goals should be, where possible, to adapt technology developments as they emerge in order to leverage our abilities for providing enhanced imagery processing and exploitation. This may require seeding of certain technologies where appropriate, and I believe Admiral Inman will appreciate the Council keeping him advised as to how we are progressing with the development of our technological plan. [REDACTED]

Intelligence Research and Development Council

8 DEC 1981

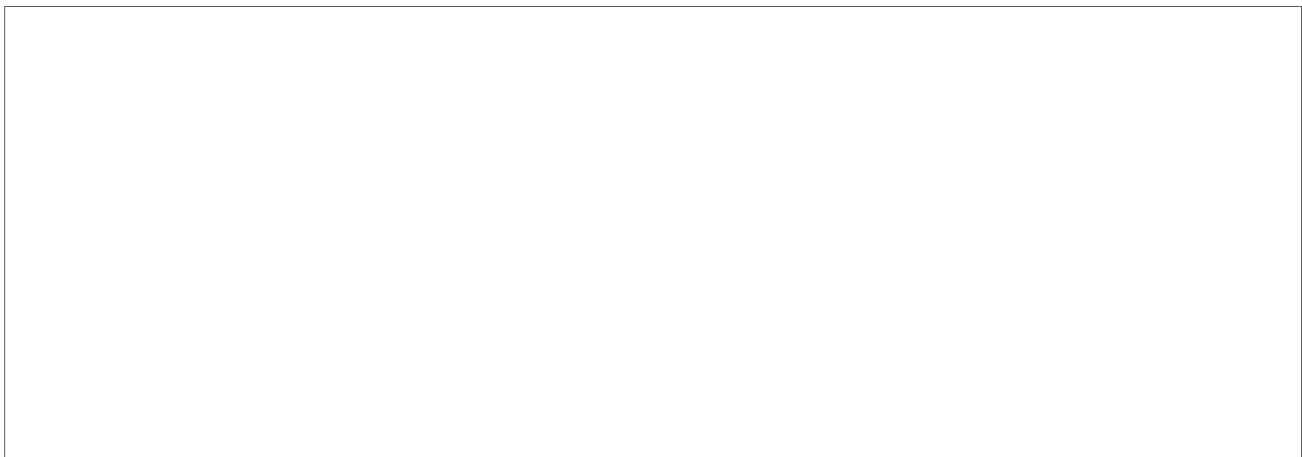

MEMORANDUM FOR: Deputy Director of Central Intelligence

FROM: Richard D. DeLauer  
Chairman, Intelligence Research and  
Development Council

SUBJECT: IR&DC Report: The Impact of Emerging Technologies  
on Imagery Processing and Exploitation

1. In June you asked that I have the Council prepare a report on how emerging technologies may impact on our future imagery processing and exploitation activities. The attached responds to your request. It was prepared by an IR&DC Imagery Exploitation Technology Working Group and represents a consensus of a cross-section of the imagery exploitation community. [REDACTED]

25X1

25X1

3. The Council recommends that an integrated development plan for image processing and exploitation technology be generated. The plan would be based upon mission requirements projected ten years ahead for each element of the exploitation community. A more detailed assessment of applicable technologies would be developed and this data, combined with the scheduled needs, will lead to the definition of logical developmental steps for each technology, and results in specific milestones and

a technology road map for the Community. A part of the plan will address standardization activity which is needed to define and promulgate hardware and software interfaces, documentation terminology, and measurement techniques, etc. The plan will be updated and briefed annually to the Council for help in outyear planning of exploitation research and development. [REDACTED]

25X1

4. The Council views the work covered by the attached report as a beginning towards generation of a requirement based, technology development plan and recommends that the elements of this plan be implemented as described above. It is further recommended that the responsibility for developing and monitoring this plan be placed with the Exploitation Research and Development Subcommittee (EXRAND) of the Committee on Imagery Requirements and Exploitation (COMIREX). The Chairman of COMIREX is agreeable for EXRAND to assume this task since there is a direct correspondence with the EXRAND charter and since valuable continuity will be maintained by virtue of commonality between key IR&DC Working Group and EXRAND members. [REDACTED]

25X1

5. The development of a plan of this type will require dedicated support. If you concur in this recommendation, I recommend that you allocate in Fiscal Year 1982 [REDACTED] to the EXRAND Chairman to provide the resources for plan development and maintenance in time for an early calendar 1982 start. In addition [REDACTED] will be required in Fiscal Year 1983, while NPIC will program for this activity in 1984 and beyond. [REDACTED]

Chairman, Science and Technology Advisory Panel

25X1

FROM:

Richard D. DeLauer  
Chairman

SUBJECT:

STAP Scientific and Technical Intelligence Report

1. I have read with interest the STAP report on Scientific and Technical Intelligence. The conclusions and recommendations rightly focus on the need for a better awareness of the increasing importance of S&T intelligence to broad US national security needs and foreign policy goals. Also the findings of the lack of clearly delineated responsibilities for S&T intelligence, I believe, point out an area for management concern and where action is required.

[redacted]

25X1

2. I understand that Admiral Inman and Mr. Casey are considering your report, and I hope where possible that some of your recommendations may be adopted.
